

Ajouter Deux Fractions Propres (H)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{6}{9} + \frac{4}{16} = \text{---} + \text{---} = \text{---} = \text{---}$

2. $\frac{1}{3} + \frac{1}{7} = \text{---} + \text{---} = \text{---}$

3. $\frac{2}{3} + \frac{1}{20} = \text{---} + \text{---} = \text{---}$

4. $\frac{1}{7} + \frac{1}{5} = \text{---} + \text{---} = \text{---}$

5. $\frac{1}{4} + \frac{4}{7} = \text{---} + \text{---} = \text{---}$

6. $\frac{3}{7} + \frac{1}{12} = \text{---} + \text{---} = \text{---}$

7. $\frac{3}{6} + \frac{2}{5} = \text{---} + \text{---} = \text{---} = \text{---}$

8. $\frac{2}{4} + \frac{2}{9} = \text{---} + \text{---} = \text{---} = \text{---}$

9. $\frac{2}{4} + \frac{3}{17} = \text{---} + \text{---} = \text{---} = \text{---}$

10. $\frac{1}{2} + \frac{1}{3} = \text{---} + \text{---} = \text{---}$

Ajouter Deux Fractions Propres (H) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \frac{6}{9} + \frac{4}{16} = \frac{96}{144} + \frac{36}{144} = \frac{132}{144} = \frac{11}{12}$$

$$2. \frac{1}{3} + \frac{1}{7} = \frac{7}{21} + \frac{3}{21} = \frac{10}{21}$$

$$3. \frac{2}{3} + \frac{1}{20} = \frac{40}{60} + \frac{3}{60} = \frac{43}{60}$$

$$4. \frac{1}{7} + \frac{1}{5} = \frac{5}{35} + \frac{7}{35} = \frac{12}{35}$$

$$5. \frac{1}{4} + \frac{4}{7} = \frac{7}{28} + \frac{16}{28} = \frac{23}{28}$$

$$6. \frac{3}{7} + \frac{1}{12} = \frac{36}{84} + \frac{7}{84} = \frac{43}{84}$$

$$7. \frac{3}{6} + \frac{2}{5} = \frac{15}{30} + \frac{12}{30} = \frac{27}{30} = \frac{9}{10}$$

$$8. \frac{2}{4} + \frac{2}{9} = \frac{18}{36} + \frac{8}{36} = \frac{26}{36} = \frac{13}{18}$$

$$9. \frac{2}{4} + \frac{3}{17} = \frac{34}{68} + \frac{12}{68} = \frac{46}{68} = \frac{23}{34}$$

$$10. \frac{1}{2} + \frac{1}{3} = \frac{3}{6} + \frac{2}{6} = \frac{5}{6}$$
