

Ajouter Deux Fractions Propres (J)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{1}{7} + \frac{15}{18} = \text{---} + \text{---} = \text{---} = \text{---}$

2. $\frac{1}{2} + \frac{4}{17} = \text{---} + \text{---} = \text{---}$

3. $\frac{2}{7} + \frac{9}{13} = \text{---} + \text{---} = \text{---}$

4. $\frac{2}{5} + \frac{2}{4} = \text{---} + \text{---} = \text{---} = \text{---}$

5. $\frac{1}{2} + \frac{8}{17} = \text{---} + \text{---} = \text{---}$

6. $\frac{1}{6} + \frac{5}{19} = \text{---} + \text{---} = \text{---}$

7. $\frac{3}{4} + \frac{2}{15} = \text{---} + \text{---} = \text{---}$

8. $\frac{3}{4} + \frac{2}{17} = \text{---} + \text{---} = \text{---}$

9. $\frac{4}{7} + \frac{3}{11} = \text{---} + \text{---} = \text{---}$

10. $\frac{5}{6} + \frac{3}{19} = \text{---} + \text{---} = \text{---}$

Ajouter Deux Fractions Propres (J) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \frac{1}{7} + \frac{15}{18} = \frac{18}{126} + \frac{105}{126} = \frac{123}{126} = \frac{41}{42}$$

$$2. \frac{1}{2} + \frac{4}{17} = \frac{17}{34} + \frac{8}{34} = \frac{25}{34}$$

$$3. \frac{2}{7} + \frac{9}{13} = \frac{26}{91} + \frac{63}{91} = \frac{89}{91}$$

$$4. \frac{2}{5} + \frac{2}{4} = \frac{8}{20} + \frac{10}{20} = \frac{18}{20} = \frac{9}{10}$$

$$5. \frac{1}{2} + \frac{8}{17} = \frac{17}{34} + \frac{16}{34} = \frac{33}{34}$$

$$6. \frac{1}{6} + \frac{5}{19} = \frac{19}{114} + \frac{30}{114} = \frac{49}{114}$$

$$7. \frac{3}{4} + \frac{2}{15} = \frac{45}{60} + \frac{8}{60} = \frac{53}{60}$$

$$8. \frac{3}{4} + \frac{2}{17} = \frac{51}{68} + \frac{8}{68} = \frac{59}{68}$$

$$9. \frac{4}{7} + \frac{3}{11} = \frac{44}{77} + \frac{21}{77} = \frac{65}{77}$$

$$10. \frac{5}{6} + \frac{3}{19} = \frac{95}{114} + \frac{18}{114} = \frac{113}{114}$$
