

Ajouter Deux Fractions Propres (A)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{6}{8} + \frac{6}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$
Denominator Résoudre Simplifier Conversion ↓

2. $\frac{1}{3} + \frac{9}{13} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{3}{6} + \frac{3}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{5}{7} + \frac{4}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{7}{8} + \frac{7}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{1}{2} + \frac{12}{19} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\frac{3}{8} + \frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{1}{3} + \frac{14}{16} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{6}{7} + \frac{13}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{1}{2} + \frac{6}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

Ajouter Deux Fractions Propres (A) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \quad \frac{6}{8} + \frac{6}{9} = \frac{54}{72} + \frac{48}{72} = \frac{102}{72} = \frac{17}{12} = 1\frac{5}{12}$$

$$2. \quad \frac{1}{3} + \frac{9}{13} = \frac{13}{39} + \frac{27}{39} = \frac{40}{39} = 1\frac{1}{39}$$

$$3. \quad \frac{3}{6} + \frac{3}{5} = \frac{15}{30} + \frac{18}{30} = \frac{33}{30} = \frac{11}{10} = 1\frac{1}{10}$$

$$4. \quad \frac{5}{7} + \frac{4}{6} = \frac{30}{42} + \frac{28}{42} = \frac{58}{42} = \frac{29}{21} = 1\frac{8}{21}$$

$$5. \quad \frac{7}{8} + \frac{7}{11} = \frac{77}{88} + \frac{56}{88} = \frac{133}{88} = 1\frac{45}{88}$$

$$6. \quad \frac{1}{2} + \frac{12}{19} = \frac{19}{38} + \frac{24}{38} = \frac{43}{38} = 1\frac{5}{38}$$

$$7. \quad \frac{3}{8} + \frac{2}{3} = \frac{9}{24} + \frac{16}{24} = \frac{25}{24} = 1\frac{1}{24}$$

$$8. \quad \frac{1}{3} + \frac{14}{16} = \frac{16}{48} + \frac{42}{48} = \frac{58}{48} = \frac{29}{24} = 1\frac{5}{24}$$

$$9. \quad \frac{6}{7} + \frac{13}{20} = \frac{120}{140} + \frac{91}{140} = \frac{211}{140} = 1\frac{71}{140}$$

$$10. \quad \frac{1}{2} + \frac{6}{9} = \frac{9}{18} + \frac{12}{18} = \frac{21}{18} = \frac{7}{6} = 1\frac{1}{6}$$
