

Ajouter Deux Fractions Propres (J)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{2}{5} + \frac{4}{15} = \text{---} + \text{---} = \text{---} = \text{---}$

2. $\frac{1}{4} + \frac{2}{12} = \text{---} + \text{---} = \text{---}$

3. $\frac{2}{4} + \frac{1}{20} = \text{---} + \text{---} = \text{---}$

4. $\frac{2}{8} + \frac{4}{16} = \text{---} + \text{---} = \text{---} = \text{---}$

5. $\frac{1}{9} + \frac{1}{3} = \text{---} + \text{---} = \text{---}$

6. $\frac{2}{8} + \frac{5}{16} = \text{---} + \text{---} = \text{---}$

7. $\frac{1}{4} + \frac{1}{12} = \text{---} + \text{---} = \text{---} = \text{---}$

8. $\frac{4}{8} + \frac{1}{4} = \text{---} + \text{---} = \text{---} = \text{---}$

9. $\frac{2}{9} + \frac{1}{3} = \text{---} + \text{---} = \text{---}$

10. $\frac{1}{7} + \frac{9}{14} = \text{---} + \text{---} = \text{---}$

Ajouter Deux Fractions Propres (J) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \frac{2}{5} + \frac{4}{15} = \frac{6}{15} + \frac{4}{15} = \frac{10}{15} = \frac{2}{3}$$

$$2. \frac{1}{4} + \frac{2}{12} = \frac{3}{12} + \frac{2}{12} = \frac{5}{12}$$

$$3. \frac{2}{4} + \frac{1}{20} = \frac{10}{20} + \frac{1}{20} = \frac{11}{20}$$

$$4. \frac{2}{8} + \frac{4}{16} = \frac{4}{16} + \frac{4}{16} = \frac{8}{16} = \frac{1}{2}$$

$$5. \frac{1}{9} + \frac{1}{3} = \frac{1}{9} + \frac{3}{9} = \frac{4}{9}$$

$$6. \frac{2}{8} + \frac{5}{16} = \frac{4}{16} + \frac{5}{16} = \frac{9}{16}$$

$$7. \frac{1}{4} + \frac{1}{12} = \frac{3}{12} + \frac{1}{12} = \frac{4}{12} = \frac{1}{3}$$

$$8. \frac{4}{8} + \frac{1}{4} = \frac{4}{8} + \frac{2}{8} = \frac{6}{8} = \frac{3}{4}$$

$$9. \frac{2}{9} + \frac{1}{3} = \frac{2}{9} + \frac{3}{9} = \frac{5}{9}$$

$$10. \frac{1}{7} + \frac{9}{14} = \frac{2}{14} + \frac{9}{14} = \frac{11}{14}$$
