

Ajouter Deux Fractions Propres (G)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{2}{4} + \frac{16}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{3}{4} + \frac{8}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{3}{5} + \frac{17}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{2}{4} + \frac{9}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{6}{8} + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{6}{7} + \frac{5}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\frac{5}{8} + \frac{8}{16} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{1}{2} + \frac{5}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{5}{6} + \frac{8}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{2}{3} + \frac{5}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

Ajouter Deux Fractions Propres (G) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \quad \frac{2}{4} + \frac{16}{20} = \frac{10}{20} + \frac{16}{20} = \frac{26}{20} = \frac{13}{10} = 1\frac{3}{10}$$

$$2. \quad \frac{3}{4} + \frac{8}{20} = \frac{15}{20} + \frac{8}{20} = \frac{23}{20} = 1\frac{3}{20}$$

$$3. \quad \frac{3}{5} + \frac{17}{20} = \frac{12}{20} + \frac{17}{20} = \frac{29}{20} = 1\frac{9}{20}$$

$$4. \quad \frac{2}{4} + \frac{9}{12} = \frac{6}{12} + \frac{9}{12} = \frac{15}{12} = \frac{5}{4} = 1\frac{1}{4}$$

$$5. \quad \frac{6}{8} + \frac{1}{2} = \frac{6}{8} + \frac{4}{8} = \frac{10}{8} = \frac{5}{4} = 1\frac{1}{4}$$

$$6. \quad \frac{6}{7} + \frac{5}{14} = \frac{12}{14} + \frac{5}{14} = \frac{17}{14} = 1\frac{3}{14}$$

$$7. \quad \frac{5}{8} + \frac{8}{16} = \frac{10}{16} + \frac{8}{16} = \frac{18}{16} = \frac{9}{8} = 1\frac{1}{8}$$

$$8. \quad \frac{1}{2} + \frac{5}{6} = \frac{3}{6} + \frac{5}{6} = \frac{8}{6} = \frac{4}{3} = 1\frac{1}{3}$$

$$9. \quad \frac{5}{6} + \frac{8}{12} = \frac{10}{12} + \frac{8}{12} = \frac{18}{12} = \frac{3}{2} = 1\frac{1}{2}$$

$$10. \quad \frac{2}{3} + \frac{5}{6} = \frac{4}{6} + \frac{5}{6} = \frac{9}{6} = \frac{3}{2} = 1\frac{1}{2}$$
