

Addition de Fractions Mixtes (A)

Évaluez chaque expression.

1. $1\frac{1}{2} + 3\frac{1}{2}$

5. $1\frac{7}{11} + 7\frac{1}{4}$

9. $1\frac{4}{13} + 4\frac{1}{3}$

2. $3\frac{2}{3} + 27\frac{1}{2}$

6. $2\frac{2}{7} + 1\frac{5}{8}$

10. $3\frac{2}{3} + 9\frac{4}{5}$

3. $9\frac{1}{2} + 1\frac{6}{11}$

7. $4\frac{1}{2} + 2\frac{1}{18}$

11. $1\frac{8}{25} + 5\frac{1}{2}$

4. $1\frac{2}{13} + 3\frac{1}{2}$

8. $2\frac{5}{11} + 5\frac{1}{2}$

12. $2\frac{1}{3} + 1\frac{5}{7}$

Addition de Fractions Mixtes (A) Answers

Évaluez chaque expression.

$$1. 1\frac{1}{2} + 3\frac{1}{2} \\ = 5$$

$$5. 1\frac{7}{11} + 7\frac{1}{4} \\ = \frac{391}{44} = 8\frac{39}{44}$$

$$9. 1\frac{4}{13} + 4\frac{1}{3} \\ = \frac{220}{39} = 5\frac{25}{39}$$

$$2. 3\frac{2}{3} + 27\frac{1}{2} \\ = \frac{187}{6} = 31\frac{1}{6}$$

$$6. 2\frac{2}{7} + 1\frac{5}{8} \\ = \frac{219}{56} = 3\frac{51}{56}$$

$$10. 3\frac{2}{3} + 9\frac{4}{5} \\ = \frac{202}{15} = 13\frac{7}{15}$$

$$3. 9\frac{1}{2} + 1\frac{6}{11} \\ = \frac{243}{22} = 11\frac{1}{22}$$

$$7. 4\frac{1}{2} + 2\frac{1}{18} \\ = \frac{59}{9} = 6\frac{5}{9}$$

$$11. 1\frac{8}{25} + 5\frac{1}{2} \\ = \frac{341}{50} = 6\frac{41}{50}$$

$$4. 1\frac{2}{13} + 3\frac{1}{2} \\ = \frac{121}{26} = 4\frac{17}{26}$$

$$8. 2\frac{5}{11} + 5\frac{1}{2} \\ = \frac{175}{22} = 7\frac{21}{22}$$

$$12. 2\frac{1}{3} + 1\frac{5}{7} \\ = \frac{85}{21} = 4\frac{1}{21}$$
