

Ajouter et Soustraire Deux Fractions (E)

Nom: _____

Date: _____

Note: _____

Calculez chaque résultat.

1. $\frac{31}{8} - \frac{5}{8} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{21}{8} - \frac{12}{8} = \underline{\quad} = \underline{\quad}$

3. $\frac{8}{9} + \frac{24}{9} = \underline{\quad} = \underline{\quad}$

4. $\frac{4}{7} + \frac{16}{7} = \underline{\quad} = \underline{\quad}$

5. $\frac{28}{8} - \frac{10}{8} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{5}{2} + \frac{1}{2} = \underline{\quad} = \underline{\quad} =$

7. $\frac{3}{2} + \frac{7}{2} = \underline{\quad} = \underline{\quad} =$

8. $\frac{3}{8} + \frac{10}{8} = \underline{\quad} = \underline{\quad}$

9. $\frac{31}{8} - \frac{14}{8} = \underline{\quad} = \underline{\quad}$

10. $\frac{17}{7} - \frac{6}{7} = \underline{\quad} = \underline{\quad}$

Ajouter et Soustraire Deux Fractions (E) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque résultat.

$$1. \quad \frac{31}{8} - \frac{5}{8} = \frac{26}{8} = \frac{13}{4} = 3\frac{1}{4}$$

$$2. \quad \frac{21}{8} - \frac{12}{8} = \frac{9}{8} = 1\frac{1}{8}$$

$$3. \quad \frac{8}{9} + \frac{24}{9} = \frac{32}{9} = 3\frac{5}{9}$$

$$4. \quad \frac{4}{7} + \frac{16}{7} = \frac{20}{7} = 2\frac{6}{7}$$

$$5. \quad \frac{28}{8} - \frac{10}{8} = \frac{18}{8} = \frac{9}{4} = 2\frac{1}{4}$$

$$6. \quad \frac{5}{2} + \frac{1}{2} = \frac{6}{2} = \frac{3}{1} = 3$$

$$7. \quad \frac{3}{2} + \frac{7}{2} = \frac{10}{2} = \frac{5}{1} = 5$$

$$8. \quad \frac{3}{8} + \frac{10}{8} = \frac{13}{8} = 1\frac{5}{8}$$

$$9. \quad \frac{31}{8} - \frac{14}{8} = \frac{17}{8} = 2\frac{1}{8}$$

$$10. \quad \frac{17}{7} - \frac{6}{7} = \frac{11}{7} = 1\frac{4}{7}$$
