

Ajouter et Soustraire Deux Fractions (J)

Nom: _____

Date: _____

Note: _____

Calculez chaque résultat.

1. $\frac{7}{2} + \frac{1}{2} = \underline{\quad} = \underline{\quad} =$

2. $\frac{32}{9} + \frac{35}{9} = \underline{\quad} = \underline{\quad}$

3. $\frac{23}{8} - \frac{1}{8} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{32}{9} - \frac{13}{9} = \underline{\quad} = \underline{\quad}$

5. $\frac{28}{8} + \frac{2}{8} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{29}{8} + \frac{10}{8} = \underline{\quad} = \underline{\quad}$

7. $\frac{17}{9} + \frac{30}{9} = \underline{\quad} = \underline{\quad}$

8. $\frac{24}{7} - \frac{16}{7} = \underline{\quad} = \underline{\quad}$

9. $\frac{13}{5} - \frac{1}{5} = \underline{\quad} = \underline{\quad}$

10. $\frac{10}{4} - \frac{2}{4} = \underline{\quad} = \underline{\quad} =$

Ajouter et Soustraire Deux Fractions (J) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque résultat.

$$1. \quad \frac{7}{2} + \frac{1}{2} = \frac{8}{2} = \frac{4}{1} = 4$$

$$2. \quad \frac{32}{9} + \frac{35}{9} = \frac{67}{9} = 7\frac{4}{9}$$

$$3. \quad \frac{23}{8} - \frac{1}{8} = \frac{22}{8} = \frac{11}{4} = 2\frac{3}{4}$$

$$4. \quad \frac{32}{9} - \frac{13}{9} = \frac{19}{9} = 2\frac{1}{9}$$

$$5. \quad \frac{28}{8} + \frac{2}{8} = \frac{30}{8} = \frac{15}{4} = 3\frac{3}{4}$$

$$6. \quad \frac{29}{8} + \frac{10}{8} = \frac{39}{8} = 4\frac{7}{8}$$

$$7. \quad \frac{17}{9} + \frac{30}{9} = \frac{47}{9} = 5\frac{2}{9}$$

$$8. \quad \frac{24}{7} - \frac{16}{7} = \frac{8}{7} = 1\frac{1}{7}$$

$$9. \quad \frac{13}{5} - \frac{1}{5} = \frac{12}{5} = 2\frac{2}{5}$$

$$10. \quad \frac{10}{4} - \frac{2}{4} = \frac{8}{4} = \frac{2}{1} = 2$$
