

Ajouter et Soustraire Deux Fractions (E)

Nom: _____

Date: _____

Note: _____

Calculez chaque résultat.

1. $\frac{2}{5} + \frac{34}{10} = \text{---} + \text{---} = \text{---} = \text{---} = \text{---}$

2. $\frac{37}{12} - \frac{5}{4} = \text{---} - \text{---} = \text{---} = \text{---} = \text{---}$

3. $\frac{67}{18} - \frac{20}{9} = \text{---} - \text{---} = \text{---} = \text{---} = \text{---}$

4. $\frac{20}{9} + \frac{30}{18} = \text{---} + \text{---} = \text{---} = \text{---} = \text{---}$

5. $\frac{10}{7} + \frac{52}{14} = \text{---} + \text{---} = \text{---} = \text{---} = \text{---}$

6. $\frac{11}{3} - \frac{5}{9} = \text{---} - \text{---} = \text{---} = \text{---}$

7. $\frac{13}{6} + \frac{11}{3} = \text{---} + \text{---} = \text{---} = \text{---}$

8. $\frac{9}{5} + \frac{35}{10} = \text{---} + \text{---} = \text{---} = \text{---}$

9. $\frac{54}{14} - \frac{16}{7} = \text{---} - \text{---} = \text{---} = \text{---} = \text{---}$

10. $\frac{10}{3} - \frac{5}{6} = \text{---} - \text{---} = \text{---} = \text{---} = \text{---}$

Ajouter et Soustraire Deux Fractions (E) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque résultat.

$$1. \quad \frac{2}{5} + \frac{34}{10} = \frac{4}{10} + \frac{34}{10} = \frac{38}{10} = \frac{19}{5} = 3\frac{4}{5}$$

$$2. \quad \frac{37}{12} - \frac{5}{4} = \frac{37}{12} - \frac{15}{12} = \frac{22}{12} = \frac{11}{6} = 1\frac{5}{6}$$

$$3. \quad \frac{67}{18} - \frac{20}{9} = \frac{67}{18} - \frac{40}{18} = \frac{27}{18} = \frac{3}{2} = 1\frac{1}{2}$$

$$4. \quad \frac{20}{9} + \frac{30}{18} = \frac{40}{18} + \frac{30}{18} = \frac{70}{18} = \frac{35}{9} = 3\frac{8}{9}$$

$$5. \quad \frac{10}{7} + \frac{52}{14} = \frac{20}{14} + \frac{52}{14} = \frac{72}{14} = \frac{36}{7} = 5\frac{1}{7}$$

$$6. \quad \frac{11}{3} - \frac{5}{9} = \frac{33}{9} - \frac{5}{9} = \frac{28}{9} = 3\frac{1}{9}$$

$$7. \quad \frac{13}{6} + \frac{11}{3} = \frac{13}{6} + \frac{22}{6} = \frac{35}{6} = 5\frac{5}{6}$$

$$8. \quad \frac{9}{5} + \frac{35}{10} = \frac{18}{10} + \frac{35}{10} = \frac{53}{10} = 5\frac{3}{10}$$

$$9. \quad \frac{54}{14} - \frac{16}{7} = \frac{54}{14} - \frac{32}{14} = \frac{22}{14} = \frac{11}{7} = 1\frac{4}{7}$$

$$10. \quad \frac{10}{3} - \frac{5}{6} = \frac{20}{6} - \frac{5}{6} = \frac{15}{6} = \frac{5}{2} = 2\frac{1}{2}$$
