

Ajouter Deux Fractions Propres (B)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{3}{6} + \frac{4}{12} =$

2. $\frac{2}{3} + \frac{2}{12} =$

3. $\frac{2}{3} + \frac{2}{18} =$

4. $\frac{1}{5} + \frac{4}{10} =$

5. $\frac{1}{2} + \frac{1}{10} =$

6. $\frac{4}{9} + \frac{1}{18} =$

7. $\frac{2}{5} + \frac{6}{15} =$

8. $\frac{1}{4} + \frac{3}{20} =$

9. $\frac{2}{7} + \frac{3}{14} =$

10. $\frac{2}{9} + \frac{2}{18} =$

Ajouter Deux Fractions Propres (B) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \frac{3}{6} + \frac{4}{12} = \frac{6}{12} + \frac{4}{12} = \frac{10}{12} = \frac{5}{6}$$

$$2. \frac{2}{3} + \frac{2}{12} = \frac{8}{12} + \frac{2}{12} = \frac{10}{12} = \frac{5}{6}$$

$$3. \frac{2}{3} + \frac{2}{18} = \frac{12}{18} + \frac{2}{18} = \frac{14}{18} = \frac{7}{9}$$

$$4. \frac{1}{5} + \frac{4}{10} = \frac{2}{10} + \frac{4}{10} = \frac{6}{10} = \frac{3}{5}$$

$$5. \frac{1}{2} + \frac{1}{10} = \frac{5}{10} + \frac{1}{10} = \frac{6}{10} = \frac{3}{5}$$

$$6. \frac{4}{9} + \frac{1}{18} = \frac{8}{18} + \frac{1}{18} = \frac{9}{18} = \frac{1}{2}$$

$$7. \frac{2}{5} + \frac{6}{15} = \frac{6}{15} + \frac{6}{15} = \frac{12}{15} = \frac{4}{5}$$

$$8. \frac{1}{4} + \frac{3}{20} = \frac{5}{20} + \frac{3}{20} = \frac{8}{20} = \frac{2}{5}$$

$$9. \frac{2}{7} + \frac{3}{14} = \frac{4}{14} + \frac{3}{14} = \frac{7}{14} = \frac{1}{2}$$

$$10. \frac{2}{9} + \frac{2}{18} = \frac{4}{18} + \frac{2}{18} = \frac{6}{18} = \frac{1}{3}$$
