

## Ajouter Deux Fractions Propres (H)

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

1.  $\frac{1}{3} + \frac{1}{15} =$

2.  $\frac{2}{7} + \frac{2}{14} =$

3.  $\frac{1}{3} + \frac{3}{9} =$

4.  $\frac{2}{7} + \frac{3}{14} =$

5.  $\frac{1}{3} + \frac{4}{12} =$

6.  $\frac{3}{7} + \frac{2}{14} =$

7.  $\frac{1}{4} + \frac{4}{16} =$

8.  $\frac{1}{7} + \frac{4}{14} =$

9.  $\frac{2}{6} + \frac{10}{18} =$

10.  $\frac{3}{7} + \frac{1}{14} =$

## Ajouter Deux Fractions Propres (H) Réponses

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

$$1. \frac{1}{3} + \frac{1}{15} = \frac{5}{15} + \frac{1}{15} = \frac{6}{15} = \frac{2}{5}$$

$$2. \frac{2}{7} + \frac{2}{14} = \frac{4}{14} + \frac{2}{14} = \frac{6}{14} = \frac{3}{7}$$

$$3. \frac{1}{3} + \frac{3}{9} = \frac{3}{9} + \frac{3}{9} = \frac{6}{9} = \frac{2}{3}$$

$$4. \frac{2}{7} + \frac{3}{14} = \frac{4}{14} + \frac{3}{14} = \frac{7}{14} = \frac{1}{2}$$

$$5. \frac{1}{3} + \frac{4}{12} = \frac{4}{12} + \frac{4}{12} = \frac{8}{12} = \frac{2}{3}$$

$$6. \frac{3}{7} + \frac{2}{14} = \frac{6}{14} + \frac{2}{14} = \frac{8}{14} = \frac{4}{7}$$

$$7. \frac{1}{4} + \frac{4}{16} = \frac{4}{16} + \frac{4}{16} = \frac{8}{16} = \frac{1}{2}$$

$$8. \frac{1}{7} + \frac{4}{14} = \frac{2}{14} + \frac{4}{14} = \frac{6}{14} = \frac{3}{7}$$

$$9. \frac{2}{6} + \frac{10}{18} = \frac{6}{18} + \frac{10}{18} = \frac{16}{18} = \frac{8}{9}$$

$$10. \frac{3}{7} + \frac{1}{14} = \frac{6}{14} + \frac{1}{14} = \frac{7}{14} = \frac{1}{2}$$
