

## Ajouter Deux Fractions Propres (C)

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

1.  $\frac{2}{4} + \frac{2}{12} =$

2.  $\frac{2}{4} + \frac{3}{8} =$

3.  $\frac{3}{9} + \frac{4}{18} =$

4.  $\frac{2}{8} + \frac{1}{2} =$

5.  $\frac{2}{6} + \frac{1}{2} =$

6.  $\frac{5}{8} + \frac{2}{16} =$

7.  $\frac{1}{5} + \frac{3}{10} =$

8.  $\frac{1}{2} + \frac{4}{14} =$

9.  $\frac{1}{7} + \frac{4}{14} =$

10.  $\frac{2}{7} + \frac{4}{14} =$

## Ajouter Deux Fractions Propres (C) Réponses

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

$$1. \frac{2}{4} + \frac{2}{12} = \frac{6}{12} + \frac{2}{12} = \frac{8}{12} = \frac{2}{3}$$

$$2. \frac{2}{4} + \frac{3}{8} = \frac{4}{8} + \frac{3}{8} = \frac{7}{8}$$

$$3. \frac{3}{9} + \frac{4}{18} = \frac{6}{18} + \frac{4}{18} = \frac{10}{18} = \frac{5}{9}$$

$$4. \frac{2}{8} + \frac{1}{2} = \frac{2}{8} + \frac{4}{8} = \frac{6}{8} = \frac{3}{4}$$

$$5. \frac{2}{6} + \frac{1}{2} = \frac{2}{6} + \frac{3}{6} = \frac{5}{6}$$

$$6. \frac{5}{8} + \frac{2}{16} = \frac{10}{16} + \frac{2}{16} = \frac{12}{16} = \frac{3}{4}$$

$$7. \frac{1}{5} + \frac{3}{10} = \frac{2}{10} + \frac{3}{10} = \frac{5}{10} = \frac{1}{2}$$

$$8. \frac{1}{2} + \frac{4}{14} = \frac{7}{14} + \frac{4}{14} = \frac{11}{14}$$

$$9. \frac{1}{7} + \frac{4}{14} = \frac{2}{14} + \frac{4}{14} = \frac{6}{14} = \frac{3}{7}$$

$$10. \frac{2}{7} + \frac{4}{14} = \frac{4}{14} + \frac{4}{14} = \frac{8}{14} = \frac{4}{7}$$
