

## Ajouter Deux Fractions Propres (H)

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

1.  $\frac{1}{2} + \frac{2}{16} =$

2.  $\frac{4}{6} + \frac{5}{18} =$

3.  $\frac{3}{8} + \frac{1}{2} =$

4.  $\frac{2}{6} + \frac{1}{2} =$

5.  $\frac{1}{4} + \frac{1}{8} =$

6.  $\frac{1}{9} + \frac{10}{18} =$

7.  $\frac{1}{3} + \frac{3}{9} =$

8.  $\frac{3}{4} + \frac{1}{16} =$

9.  $\frac{3}{6} + \frac{4}{12} =$

10.  $\frac{2}{7} + \frac{3}{14} =$

## Ajouter Deux Fractions Propres (H) Réponses

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

$$1. \frac{1}{2} + \frac{2}{16} = \frac{8}{16} + \frac{2}{16} = \frac{10}{16} = \frac{5}{8}$$

$$2. \frac{4}{6} + \frac{5}{18} = \frac{12}{18} + \frac{5}{18} = \frac{17}{18}$$

$$3. \frac{3}{8} + \frac{1}{2} = \frac{3}{8} + \frac{4}{8} = \frac{7}{8}$$

$$4. \frac{2}{6} + \frac{1}{2} = \frac{2}{6} + \frac{3}{6} = \frac{5}{6}$$

$$5. \frac{1}{4} + \frac{1}{8} = \frac{2}{8} + \frac{1}{8} = \frac{3}{8}$$

$$6. \frac{1}{9} + \frac{10}{18} = \frac{2}{18} + \frac{10}{18} = \frac{12}{18} = \frac{2}{3}$$

$$7. \frac{1}{3} + \frac{3}{9} = \frac{3}{9} + \frac{3}{9} = \frac{6}{9} = \frac{2}{3}$$

$$8. \frac{3}{4} + \frac{1}{16} = \frac{12}{16} + \frac{1}{16} = \frac{13}{16}$$

$$9. \frac{3}{6} + \frac{4}{12} = \frac{6}{12} + \frac{4}{12} = \frac{10}{12} = \frac{5}{6}$$

$$10. \frac{2}{7} + \frac{3}{14} = \frac{4}{14} + \frac{3}{14} = \frac{7}{14} = \frac{1}{2}$$
