

## Ajouter Deux Fractions Propres (B)

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

1.  $\frac{4}{6} + \frac{1}{2} =$

2.  $\frac{4}{5} + \frac{3}{10} =$

3.  $\frac{8}{9} + \frac{2}{3} =$

4.  $\frac{6}{7} + \frac{5}{14} =$

5.  $\frac{7}{9} + \frac{15}{18} =$

6.  $\frac{1}{2} + \frac{13}{16} =$

7.  $\frac{5}{8} + \frac{1}{2} =$

8.  $\frac{1}{2} + \frac{10}{14} =$

9.  $\frac{2}{6} + \frac{13}{18} =$

10.  $\frac{4}{7} + \frac{9}{14} =$

## Ajouter Deux Fractions Propres (B) Réponses

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

$$1. \quad \frac{4}{6} + \frac{1}{2} = \frac{4}{6} + \frac{3}{6} = \frac{7}{6} = 1\frac{1}{6}$$

$$2. \quad \frac{4}{5} + \frac{3}{10} = \frac{8}{10} + \frac{3}{10} = \frac{11}{10} = 1\frac{1}{10}$$

$$3. \quad \frac{8}{9} + \frac{2}{3} = \frac{8}{9} + \frac{6}{9} = \frac{14}{9} = 1\frac{5}{9}$$

$$4. \quad \frac{6}{7} + \frac{5}{14} = \frac{12}{14} + \frac{5}{14} = \frac{17}{14} = 1\frac{3}{14}$$

$$5. \quad \frac{7}{9} + \frac{15}{18} = \frac{14}{18} + \frac{15}{18} = \frac{29}{18} = 1\frac{11}{18}$$

$$6. \quad \frac{1}{2} + \frac{13}{16} = \frac{8}{16} + \frac{13}{16} = \frac{21}{16} = 1\frac{5}{16}$$

$$7. \quad \frac{5}{8} + \frac{1}{2} = \frac{5}{8} + \frac{4}{8} = \frac{9}{8} = 1\frac{1}{8}$$

$$8. \quad \frac{1}{2} + \frac{10}{14} = \frac{7}{14} + \frac{10}{14} = \frac{17}{14} = 1\frac{3}{14}$$

$$9. \quad \frac{2}{6} + \frac{13}{18} = \frac{6}{18} + \frac{13}{18} = \frac{19}{18} = 1\frac{1}{18}$$

$$10. \quad \frac{4}{7} + \frac{9}{14} = \frac{8}{14} + \frac{9}{14} = \frac{17}{14} = 1\frac{3}{14}$$
