

## Ajouter Deux Fractions Propres (G)

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

1.  $\frac{2}{7} + \frac{11}{14} =$

2.  $\frac{3}{5} + \frac{8}{15} =$

3.  $\frac{1}{3} + \frac{8}{9} =$

4.  $\frac{5}{7} + \frac{7}{14} =$

5.  $\frac{5}{8} + \frac{1}{2} =$

6.  $\frac{4}{7} + \frac{11}{14} =$

7.  $\frac{3}{6} + \frac{2}{3} =$

8.  $\frac{1}{2} + \frac{11}{16} =$

9.  $\frac{3}{5} + \frac{7}{10} =$

10.  $\frac{1}{3} + \frac{12}{15} =$

## Ajouter Deux Fractions Propres (G) Réponses

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

$$1. \frac{2}{7} + \frac{11}{14} = \frac{4}{14} + \frac{11}{14} = \frac{15}{14} = 1\frac{1}{14}$$

$$2. \frac{3}{5} + \frac{8}{15} = \frac{9}{15} + \frac{8}{15} = \frac{17}{15} = 1\frac{2}{15}$$

$$3. \frac{1}{3} + \frac{8}{9} = \frac{3}{9} + \frac{8}{9} = \frac{11}{9} = 1\frac{2}{9}$$

$$4. \frac{5}{7} + \frac{7}{14} = \frac{10}{14} + \frac{7}{14} = \frac{17}{14} = 1\frac{3}{14}$$

$$5. \frac{5}{8} + \frac{1}{2} = \frac{5}{8} + \frac{4}{8} = \frac{9}{8} = 1\frac{1}{8}$$

$$6. \frac{4}{7} + \frac{11}{14} = \frac{8}{14} + \frac{11}{14} = \frac{19}{14} = 1\frac{5}{14}$$

$$7. \frac{3}{6} + \frac{2}{3} = \frac{3}{6} + \frac{4}{6} = \frac{7}{6} = 1\frac{1}{6}$$

$$8. \frac{1}{2} + \frac{11}{16} = \frac{8}{16} + \frac{11}{16} = \frac{19}{16} = 1\frac{3}{16}$$

$$9. \frac{3}{5} + \frac{7}{10} = \frac{6}{10} + \frac{7}{10} = \frac{13}{10} = 1\frac{3}{10}$$

$$10. \frac{1}{3} + \frac{12}{15} = \frac{5}{15} + \frac{12}{15} = \frac{17}{15} = 1\frac{2}{15}$$
