

Ajouter Deux Fractions Propres (A)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{3}{7} + \frac{10}{14} =$

2. $\frac{1}{2} + \frac{9}{12} =$

3. $\frac{1}{3} + \frac{17}{18} =$

4. $\frac{5}{8} + \frac{1}{2} =$

5. $\frac{1}{2} + \frac{6}{8} =$

6. $\frac{1}{3} + \frac{9}{12} =$

7. $\frac{4}{6} + \frac{1}{2} =$

8. $\frac{5}{7} + \frac{5}{14} =$

9. $\frac{4}{6} + \frac{6}{12} =$

10. $\frac{6}{7} + \frac{11}{14} =$

Ajouter Deux Fractions Propres (A) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \frac{3}{7} + \frac{10}{14} = \frac{6}{14} + \frac{10}{14} = \frac{16}{14} = \frac{8}{7} = 1\frac{1}{7}$$

$$2. \frac{1}{2} + \frac{9}{12} = \frac{6}{12} + \frac{9}{12} = \frac{15}{12} = \frac{5}{4} = 1\frac{1}{4}$$

$$3. \frac{1}{3} + \frac{17}{18} = \frac{6}{18} + \frac{17}{18} = \frac{23}{18} = 1\frac{5}{18}$$

$$4. \frac{5}{8} + \frac{1}{2} = \frac{5}{8} + \frac{4}{8} = \frac{9}{8} = 1\frac{1}{8}$$

$$5. \frac{1}{2} + \frac{6}{8} = \frac{4}{8} + \frac{6}{8} = \frac{10}{8} = \frac{5}{4} = 1\frac{1}{4}$$

$$6. \frac{1}{3} + \frac{9}{12} = \frac{4}{12} + \frac{9}{12} = \frac{13}{12} = 1\frac{1}{12}$$

$$7. \frac{4}{6} + \frac{1}{2} = \frac{4}{6} + \frac{3}{6} = \frac{7}{6} = 1\frac{1}{6}$$

$$8. \frac{5}{7} + \frac{5}{14} = \frac{10}{14} + \frac{5}{14} = \frac{15}{14} = 1\frac{1}{14}$$

$$9. \frac{4}{6} + \frac{6}{12} = \frac{8}{12} + \frac{6}{12} = \frac{14}{12} = \frac{7}{6} = 1\frac{1}{6}$$

$$10. \frac{6}{7} + \frac{11}{14} = \frac{12}{14} + \frac{11}{14} = \frac{23}{14} = 1\frac{9}{14}$$
