

## Ajouter Deux Fractions Propres (B)

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

1.  $\frac{5}{6} + \frac{5}{12} =$

2.  $\frac{6}{8} + \frac{14}{16} =$

3.  $\frac{1}{2} + \frac{3}{4} =$

4.  $\frac{4}{9} + \frac{2}{3} =$

5.  $\frac{1}{2} + \frac{5}{6} =$

6.  $\frac{3}{8} + \frac{14}{16} =$

7.  $\frac{4}{5} + \frac{9}{15} =$

8.  $\frac{5}{7} + \frac{7}{14} =$

9.  $\frac{1}{4} + \frac{19}{20} =$

10.  $\frac{7}{8} + \frac{7}{16} =$

## Ajouter Deux Fractions Propres (B) Réponses

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

$$1. \frac{5}{6} + \frac{5}{12} = \frac{10}{12} + \frac{5}{12} = \frac{15}{12} = \frac{5}{4} = 1\frac{1}{4}$$

$$2. \frac{6}{8} + \frac{14}{16} = \frac{12}{16} + \frac{14}{16} = \frac{26}{16} = \frac{13}{8} = 1\frac{5}{8}$$

$$3. \frac{1}{2} + \frac{3}{4} = \frac{2}{4} + \frac{3}{4} = \frac{5}{4} = 1\frac{1}{4}$$

$$4. \frac{4}{9} + \frac{2}{3} = \frac{4}{9} + \frac{6}{9} = \frac{10}{9} = 1\frac{1}{9}$$

$$5. \frac{1}{2} + \frac{5}{6} = \frac{3}{6} + \frac{5}{6} = \frac{8}{6} = \frac{4}{3} = 1\frac{1}{3}$$

$$6. \frac{3}{8} + \frac{14}{16} = \frac{6}{16} + \frac{14}{16} = \frac{20}{16} = \frac{5}{4} = 1\frac{1}{4}$$

$$7. \frac{4}{5} + \frac{9}{15} = \frac{12}{15} + \frac{9}{15} = \frac{21}{15} = \frac{7}{5} = 1\frac{2}{5}$$

$$8. \frac{5}{7} + \frac{7}{14} = \frac{10}{14} + \frac{7}{14} = \frac{17}{14} = 1\frac{3}{14}$$

$$9. \frac{1}{4} + \frac{19}{20} = \frac{5}{20} + \frac{19}{20} = \frac{24}{20} = \frac{6}{5} = 1\frac{1}{5}$$

$$10. \frac{7}{8} + \frac{7}{16} = \frac{14}{16} + \frac{7}{16} = \frac{21}{16} = 1\frac{5}{16}$$
