

Ajouter Deux Fractions Propres (C)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{1}{2} + \frac{6}{8} =$

2. $\frac{1}{3} + \frac{7}{9} =$

3. $\frac{4}{7} + \frac{9}{14} =$

4. $\frac{5}{8} + \frac{13}{16} =$

5. $\frac{2}{3} + \frac{8}{9} =$

6. $\frac{6}{9} + \frac{2}{3} =$

7. $\frac{5}{6} + \frac{8}{12} =$

8. $\frac{6}{7} + \frac{8}{14} =$

9. $\frac{3}{4} + \frac{6}{12} =$

10. $\frac{3}{4} + \frac{3}{8} =$

Ajouter Deux Fractions Propres (C) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \quad \frac{1}{2} + \frac{6}{8} = \frac{4}{8} + \frac{6}{8} = \frac{10}{8} = \frac{5}{4} = 1\frac{1}{4}$$

$$2. \quad \frac{1}{3} + \frac{7}{9} = \frac{3}{9} + \frac{7}{9} = \frac{10}{9} = 1\frac{1}{9}$$

$$3. \quad \frac{4}{7} + \frac{9}{14} = \frac{8}{14} + \frac{9}{14} = \frac{17}{14} = 1\frac{3}{14}$$

$$4. \quad \frac{5}{8} + \frac{13}{16} = \frac{10}{16} + \frac{13}{16} = \frac{23}{16} = 1\frac{7}{16}$$

$$5. \quad \frac{2}{3} + \frac{8}{9} = \frac{6}{9} + \frac{8}{9} = \frac{14}{9} = 1\frac{5}{9}$$

$$6. \quad \frac{6}{9} + \frac{2}{3} = \frac{6}{9} + \frac{6}{9} = \frac{12}{9} = \frac{4}{3} = 1\frac{1}{3}$$

$$7. \quad \frac{5}{6} + \frac{8}{12} = \frac{10}{12} + \frac{8}{12} = \frac{18}{12} = \frac{3}{2} = 1\frac{1}{2}$$

$$8. \quad \frac{6}{7} + \frac{8}{14} = \frac{12}{14} + \frac{8}{14} = \frac{20}{14} = \frac{10}{7} = 1\frac{3}{7}$$

$$9. \quad \frac{3}{4} + \frac{6}{12} = \frac{9}{12} + \frac{6}{12} = \frac{15}{12} = \frac{5}{4} = 1\frac{1}{4}$$

$$10. \quad \frac{3}{4} + \frac{3}{8} = \frac{6}{8} + \frac{3}{8} = \frac{9}{8} = 1\frac{1}{8}$$
