

## Ajouter Deux Fractions Propres (I)

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

1.  $\frac{6}{7} + \frac{6}{14} =$

2.  $\frac{5}{6} + \frac{11}{12} =$

3.  $\frac{2}{4} + \frac{5}{8} =$

4.  $\frac{6}{8} + \frac{9}{16} =$

5.  $\frac{7}{8} + \frac{2}{4} =$

6.  $\frac{8}{9} + \frac{6}{18} =$

7.  $\frac{1}{2} + \frac{13}{14} =$

8.  $\frac{4}{6} + \frac{17}{18} =$

9.  $\frac{1}{5} + \frac{9}{10} =$

10.  $\frac{1}{2} + \frac{7}{10} =$

## Ajouter Deux Fractions Propres (I) Réponses

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

$$1. \frac{6}{7} + \frac{6}{14} = \frac{12}{14} + \frac{6}{14} = \frac{18}{14} = \frac{9}{7} = 1\frac{2}{7}$$

$$2. \frac{5}{6} + \frac{11}{12} = \frac{10}{12} + \frac{11}{12} = \frac{21}{12} = \frac{7}{4} = 1\frac{3}{4}$$

$$3. \frac{2}{4} + \frac{5}{8} = \frac{4}{8} + \frac{5}{8} = \frac{9}{8} = 1\frac{1}{8}$$

$$4. \frac{6}{8} + \frac{9}{16} = \frac{12}{16} + \frac{9}{16} = \frac{21}{16} = 1\frac{5}{16}$$

$$5. \frac{7}{8} + \frac{2}{4} = \frac{7}{8} + \frac{4}{8} = \frac{11}{8} = 1\frac{3}{8}$$

$$6. \frac{8}{9} + \frac{6}{18} = \frac{16}{18} + \frac{6}{18} = \frac{22}{18} = \frac{11}{9} = 1\frac{2}{9}$$

$$7. \frac{1}{2} + \frac{13}{14} = \frac{7}{14} + \frac{13}{14} = \frac{20}{14} = \frac{10}{7} = 1\frac{3}{7}$$

$$8. \frac{4}{6} + \frac{17}{18} = \frac{12}{18} + \frac{17}{18} = \frac{29}{18} = 1\frac{11}{18}$$

$$9. \frac{1}{5} + \frac{9}{10} = \frac{2}{10} + \frac{9}{10} = \frac{11}{10} = 1\frac{1}{10}$$

$$10. \frac{1}{2} + \frac{7}{10} = \frac{5}{10} + \frac{7}{10} = \frac{12}{10} = \frac{6}{5} = 1\frac{1}{5}$$
