

Soustraire Deux Fractions Propres (H)

Nom: _____

Date: _____

Note: _____

Calculez chaque différence.

1. $\frac{4}{6} - \frac{1}{3} =$

2. $\frac{2}{3} - \frac{10}{18} =$

3. $\frac{2}{3} - \frac{3}{9} =$

4. $\frac{1}{2} - \frac{1}{6} =$

5. $\frac{6}{9} - \frac{1}{3} =$

6. $\frac{8}{12} - \frac{2}{6} =$

7. $\frac{6}{8} - \frac{1}{2} =$

8. $\frac{5}{6} - \frac{1}{2} =$

9. $\frac{1}{3} - \frac{4}{18} =$

10. $\frac{2}{3} - \frac{5}{15} =$

Soustraire Deux Fractions Propres (H) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque différence.

$$1. \quad \frac{4}{6} - \frac{1}{3} = \frac{4}{6} - \frac{2}{6} = \frac{2}{6} = \frac{1}{3}$$

$$2. \quad \frac{2}{3} - \frac{10}{18} = \frac{12}{18} - \frac{10}{18} = \frac{2}{18} = \frac{1}{9}$$

$$3. \quad \frac{2}{3} - \frac{3}{9} = \frac{6}{9} - \frac{3}{9} = \frac{3}{9} = \frac{1}{3}$$

$$4. \quad \frac{1}{2} - \frac{1}{6} = \frac{3}{6} - \frac{1}{6} = \frac{2}{6} = \frac{1}{3}$$

$$5. \quad \frac{6}{9} - \frac{1}{3} = \frac{6}{9} - \frac{3}{9} = \frac{3}{9} = \frac{1}{3}$$

$$6. \quad \frac{8}{12} - \frac{2}{6} = \frac{8}{12} - \frac{4}{12} = \frac{4}{12} = \frac{1}{3}$$

$$7. \quad \frac{6}{8} - \frac{1}{2} = \frac{6}{8} - \frac{4}{8} = \frac{2}{8} = \frac{1}{4}$$

$$8. \quad \frac{5}{6} - \frac{1}{2} = \frac{5}{6} - \frac{3}{6} = \frac{2}{6} = \frac{1}{3}$$

$$9. \quad \frac{1}{3} - \frac{4}{18} = \frac{6}{18} - \frac{4}{18} = \frac{2}{18} = \frac{1}{9}$$

$$10. \quad \frac{2}{3} - \frac{5}{15} = \frac{10}{15} - \frac{5}{15} = \frac{5}{15} = \frac{1}{3}$$
