

## Soustraire Deux Fractions Propres (B)

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque différence.

1.  $\frac{17}{19} - \frac{1}{6} =$

2.  $\frac{1}{2} - \frac{1}{3} =$

3.  $\frac{2}{3} - \frac{3}{14} =$

4.  $\frac{7}{19} - \frac{1}{4} =$

5.  $\frac{6}{11} - \frac{1}{2} =$

6.  $\frac{4}{5} - \frac{1}{2} =$

7.  $\frac{7}{11} - \frac{4}{7} =$

8.  $\frac{3}{11} - \frac{1}{4} =$

9.  $\frac{11}{13} - \frac{1}{4} =$

10.  $\frac{3}{4} - \frac{4}{13} =$

## Soustraire Deux Fractions Propres (B) Réponses

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque différence.

$$1. \frac{17}{19} - \frac{1}{6} = \frac{102}{114} - \frac{19}{114} = \frac{83}{114}$$

$$2. \frac{1}{2} - \frac{1}{3} = \frac{3}{6} - \frac{2}{6} = \frac{1}{6}$$

$$3. \frac{2}{3} - \frac{3}{14} = \frac{28}{42} - \frac{9}{42} = \frac{19}{42}$$

$$4. \frac{7}{19} - \frac{1}{4} = \frac{28}{76} - \frac{19}{76} = \frac{9}{76}$$

$$5. \frac{6}{11} - \frac{1}{2} = \frac{12}{22} - \frac{11}{22} = \frac{1}{22}$$

$$6. \frac{4}{5} - \frac{1}{2} = \frac{8}{10} - \frac{5}{10} = \frac{3}{10}$$

$$7. \frac{7}{11} - \frac{4}{7} = \frac{49}{77} - \frac{44}{77} = \frac{5}{77}$$

$$8. \frac{3}{11} - \frac{1}{4} = \frac{12}{44} - \frac{11}{44} = \frac{1}{44}$$

$$9. \frac{11}{13} - \frac{1}{4} = \frac{44}{52} - \frac{13}{52} = \frac{31}{52}$$

$$10. \frac{3}{4} - \frac{4}{13} = \frac{39}{52} - \frac{16}{52} = \frac{23}{52}$$
