

Ajouter Deux Fractions Propres (J)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{1}{4} + \frac{1}{2} = \text{---} + \text{---} = \text{---}$

2. $\frac{3}{4} + \frac{4}{20} = \text{---} + \text{---} = \text{---}$

3. $\frac{1}{8} + \frac{1}{4} = \text{---} + \text{---} = \text{---}$

4. $\frac{2}{6} + \frac{1}{2} = \text{---} + \text{---} = \text{---}$

5. $\frac{1}{3} + \frac{7}{18} = \text{---} + \text{---} = \text{---}$

6. $\frac{1}{2} + \frac{3}{8} = \text{---} + \text{---} = \text{---}$

7. $\frac{2}{3} + \frac{2}{9} = \text{---} + \text{---} = \text{---}$

8. $\frac{1}{3} + \frac{7}{12} = \text{---} + \text{---} = \text{---}$

9. $\frac{2}{5} + \frac{2}{15} = \text{---} + \text{---} = \text{---}$

10. $\frac{2}{7} + \frac{7}{14} = \text{---} + \text{---} = \text{---}$

Ajouter Deux Fractions Propres (J) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \quad \frac{1}{4} + \frac{1}{2} = \frac{1}{4} + \frac{2}{4} = \frac{3}{4}$$

$$2. \quad \frac{3}{4} + \frac{4}{20} = \frac{15}{20} + \frac{4}{20} = \frac{19}{20}$$

$$3. \quad \frac{1}{8} + \frac{1}{4} = \frac{1}{8} + \frac{2}{8} = \frac{3}{8}$$

$$4. \quad \frac{2}{6} + \frac{1}{2} = \frac{2}{6} + \frac{3}{6} = \frac{5}{6}$$

$$5. \quad \frac{1}{3} + \frac{7}{18} = \frac{6}{18} + \frac{7}{18} = \frac{13}{18}$$

$$6. \quad \frac{1}{2} + \frac{3}{8} = \frac{4}{8} + \frac{3}{8} = \frac{7}{8}$$

$$7. \quad \frac{2}{3} + \frac{2}{9} = \frac{6}{9} + \frac{2}{9} = \frac{8}{9}$$

$$8. \quad \frac{1}{3} + \frac{7}{12} = \frac{4}{12} + \frac{7}{12} = \frac{11}{12}$$

$$9. \quad \frac{2}{5} + \frac{2}{15} = \frac{6}{15} + \frac{2}{15} = \frac{8}{15}$$

$$10. \quad \frac{2}{7} + \frac{7}{14} = \frac{4}{14} + \frac{7}{14} = \frac{11}{14}$$
