

Ajouter Deux Fractions Propres (J)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{4}{9} + \frac{1}{8} = \text{---} + \text{---} = \text{---}$

2. $\frac{1}{4} + \frac{6}{13} = \text{---} + \text{---} = \text{---}$

3. $\frac{1}{2} + \frac{2}{11} = \text{---} + \text{---} = \text{---}$

4. $\frac{1}{9} + \frac{4}{7} = \text{---} + \text{---} = \text{---}$

5. $\frac{1}{6} + \frac{3}{7} = \text{---} + \text{---} = \text{---}$

6. $\frac{1}{8} + \frac{11}{15} = \text{---} + \text{---} = \text{---}$

7. $\frac{1}{6} + \frac{4}{5} = \text{---} + \text{---} = \text{---}$

8. $\frac{2}{9} + \frac{9}{14} = \text{---} + \text{---} = \text{---}$

9. $\frac{1}{9} + \frac{2}{13} = \text{---} + \text{---} = \text{---}$

10. $\frac{2}{9} + \frac{3}{17} = \text{---} + \text{---} = \text{---}$

Ajouter Deux Fractions Propres (J) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \quad \frac{4}{9} + \frac{1}{8} = \frac{32}{72} + \frac{9}{72} = \frac{41}{72}$$

$$2. \quad \frac{1}{4} + \frac{6}{13} = \frac{13}{52} + \frac{24}{52} = \frac{37}{52}$$

$$3. \quad \frac{1}{2} + \frac{2}{11} = \frac{11}{22} + \frac{4}{22} = \frac{15}{22}$$

$$4. \quad \frac{1}{9} + \frac{4}{7} = \frac{7}{63} + \frac{36}{63} = \frac{43}{63}$$

$$5. \quad \frac{1}{6} + \frac{3}{7} = \frac{7}{42} + \frac{18}{42} = \frac{25}{42}$$

$$6. \quad \frac{1}{8} + \frac{11}{15} = \frac{15}{120} + \frac{88}{120} = \frac{103}{120}$$

$$7. \quad \frac{1}{6} + \frac{4}{5} = \frac{5}{30} + \frac{24}{30} = \frac{29}{30}$$

$$8. \quad \frac{2}{9} + \frac{9}{14} = \frac{28}{126} + \frac{81}{126} = \frac{109}{126}$$

$$9. \quad \frac{1}{9} + \frac{2}{13} = \frac{13}{117} + \frac{18}{117} = \frac{31}{117}$$

$$10. \quad \frac{2}{9} + \frac{3}{17} = \frac{34}{153} + \frac{27}{153} = \frac{61}{153}$$
