

Ajouter Deux Fractions Propres (A)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \frac{1}{2} + \frac{6}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

Denominator

Résoudre

Simplifier

Conversion ↓

$$2. \frac{3}{6} + \frac{8}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$3. \frac{4}{5} + \frac{10}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$4. \frac{6}{8} + \frac{11}{15} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$5. \frac{2}{5} + \frac{8}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$6. \frac{6}{9} + \frac{10}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$7. \frac{6}{9} + \frac{4}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$8. \frac{2}{4} + \frac{10}{17} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$9. \frac{6}{8} + \frac{3}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$10. \frac{2}{6} + \frac{16}{19} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$$

Ajouter Deux Fractions Propres (A) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \frac{1}{2} + \frac{6}{9} = \frac{9}{18} + \frac{12}{18} = \frac{21}{18} = \frac{7}{6} = 1\frac{1}{6}$$

$$2. \frac{3}{6} + \frac{8}{11} = \frac{33}{66} + \frac{48}{66} = \frac{81}{66} = \frac{27}{22} = 1\frac{5}{22}$$

$$3. \frac{4}{5} + \frac{10}{12} = \frac{48}{60} + \frac{50}{60} = \frac{98}{60} = \frac{49}{30} = 1\frac{19}{30}$$

$$4. \frac{6}{8} + \frac{11}{15} = \frac{90}{120} + \frac{88}{120} = \frac{178}{120} = \frac{89}{60} = 1\frac{29}{60}$$

$$5. \frac{2}{5} + \frac{8}{12} = \frac{24}{60} + \frac{40}{60} = \frac{64}{60} = \frac{16}{15} = 1\frac{1}{15}$$

$$6. \frac{6}{9} + \frac{10}{11} = \frac{66}{99} + \frac{90}{99} = \frac{156}{99} = \frac{52}{33} = 1\frac{19}{33}$$

$$7. \frac{6}{9} + \frac{4}{8} = \frac{48}{72} + \frac{36}{72} = \frac{84}{72} = \frac{7}{6} = 1\frac{1}{6}$$

$$8. \frac{2}{4} + \frac{10}{17} = \frac{34}{68} + \frac{40}{68} = \frac{74}{68} = \frac{37}{34} = 1\frac{3}{34}$$

$$9. \frac{6}{8} + \frac{3}{5} = \frac{30}{40} + \frac{24}{40} = \frac{54}{40} = \frac{27}{20} = 1\frac{7}{20}$$

$$10. \frac{2}{6} + \frac{16}{19} = \frac{38}{114} + \frac{96}{114} = \frac{134}{114} = \frac{67}{57} = 1\frac{10}{57}$$
