

Ajouter Fractions Propres e Impropres (B)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

1. $\frac{1}{2} + \frac{3}{2} = \underline{\quad} = \underline{\quad} =$

2. $\frac{3}{4} + \frac{11}{4} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{1}{3} + \frac{5}{3} = \underline{\quad} = \underline{\quad} =$

4. $\frac{1}{4} + \frac{5}{4} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{3}{9} + \frac{15}{9} = \underline{\quad} = \underline{\quad} =$

6. $\frac{2}{4} + \frac{6}{4} = \underline{\quad} = \underline{\quad} =$

7. $\frac{1}{2} + \frac{5}{2} = \underline{\quad} = \underline{\quad} =$

8. $\frac{4}{9} + \frac{14}{9} = \underline{\quad} = \underline{\quad} =$

9. $\frac{1}{6} + \frac{17}{6} = \underline{\quad} = \underline{\quad} =$

10. $\frac{2}{8} + \frac{14}{8} = \underline{\quad} = \underline{\quad} =$

Ajouter Fractions Propres e Impropres (B) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \quad \frac{1}{2} + \frac{3}{2} = \frac{4}{2} = \frac{2}{1} = 2$$

$$2. \quad \frac{3}{4} + \frac{11}{4} = \frac{14}{4} = \frac{7}{2} = 3\frac{1}{2}$$

$$3. \quad \frac{1}{3} + \frac{5}{3} = \frac{6}{3} = \frac{2}{1} = 2$$

$$4. \quad \frac{1}{4} + \frac{5}{4} = \frac{6}{4} = \frac{3}{2} = 1\frac{1}{2}$$

$$5. \quad \frac{3}{9} + \frac{15}{9} = \frac{18}{9} = \frac{2}{1} = 2$$

$$6. \quad \frac{2}{4} + \frac{6}{4} = \frac{8}{4} = \frac{2}{1} = 2$$

$$7. \quad \frac{1}{2} + \frac{5}{2} = \frac{6}{2} = \frac{3}{1} = 3$$

$$8. \quad \frac{4}{9} + \frac{14}{9} = \frac{18}{9} = \frac{2}{1} = 2$$

$$9. \quad \frac{1}{6} + \frac{17}{6} = \frac{18}{6} = \frac{3}{1} = 3$$

$$10. \quad \frac{2}{8} + \frac{14}{8} = \frac{16}{8} = \frac{2}{1} = 2$$
