

Soustraire Fractions Propres e Impropres (F)

Nom: _____

Date: _____

Note: _____

Calculez chaque différence.

1. $\frac{29}{8} - \frac{6}{9} = \text{---} - \text{---} = \text{---} = \text{---} = \text{---}$

2. $\frac{10}{4} - \frac{4}{5} = \text{---} - \text{---} = \text{---} = \text{---} = \text{---}$

3. $\frac{16}{5} - \frac{6}{8} = \text{---} - \text{---} = \text{---} = \text{---} = \text{---}$

4. $\frac{43}{19} - \frac{2}{5} = \text{---} - \text{---} = \text{---} = \text{---}$

5. $\frac{8}{3} - \frac{1}{2} = \text{---} - \text{---} = \text{---} = \text{---}$

6. $\frac{16}{5} - \frac{1}{3} = \text{---} - \text{---} = \text{---} = \text{---}$

7. $\frac{28}{17} - \frac{1}{6} = \text{---} - \text{---} = \text{---} = \text{---}$

8. $\frac{41}{13} - \frac{4}{5} = \text{---} - \text{---} = \text{---} = \text{---}$

9. $\frac{13}{7} - \frac{3}{6} = \text{---} - \text{---} = \text{---} = \text{---} = \text{---}$

10. $\frac{18}{8} - \frac{1}{3} = \text{---} - \text{---} = \text{---} = \text{---} = \text{---}$

Soustraire Fractions Propres e Impropres (F) Réponses

Nom: _____

Date: _____

Note: _____

Calculez chaque différence.

$$1. \frac{29}{8} - \frac{6}{9} = \frac{261}{72} - \frac{48}{72} = \frac{213}{72} = \frac{71}{24} = 2\frac{23}{24}$$

$$2. \frac{10}{4} - \frac{4}{5} = \frac{50}{20} - \frac{16}{20} = \frac{34}{20} = \frac{17}{10} = 1\frac{7}{10}$$

$$3. \frac{16}{5} - \frac{6}{8} = \frac{128}{40} - \frac{30}{40} = \frac{98}{40} = \frac{49}{20} = 2\frac{9}{20}$$

$$4. \frac{43}{19} - \frac{2}{5} = \frac{215}{95} - \frac{38}{95} = \frac{177}{95} = 1\frac{82}{95}$$

$$5. \frac{8}{3} - \frac{1}{2} = \frac{16}{6} - \frac{3}{6} = \frac{13}{6} = 2\frac{1}{6}$$

$$6. \frac{16}{5} - \frac{1}{3} = \frac{48}{15} - \frac{5}{15} = \frac{43}{15} = 2\frac{13}{15}$$

$$7. \frac{28}{17} - \frac{1}{6} = \frac{168}{102} - \frac{17}{102} = \frac{151}{102} = 1\frac{49}{102}$$

$$8. \frac{41}{13} - \frac{4}{5} = \frac{205}{65} - \frac{52}{65} = \frac{153}{65} = 2\frac{23}{65}$$

$$9. \frac{13}{7} - \frac{3}{6} = \frac{78}{42} - \frac{21}{42} = \frac{57}{42} = \frac{19}{14} = 1\frac{5}{14}$$

$$10. \frac{18}{8} - \frac{1}{3} = \frac{54}{24} - \frac{8}{24} = \frac{46}{24} = \frac{23}{12} = 1\frac{11}{12}$$
