

Ajouter des Negative Fractions (D)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \left(-\frac{2}{4}\right) + \frac{1}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$2. \left(-\frac{4}{5}\right) + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$3. \left(-\frac{2}{4}\right) + \frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$4. \left(-\frac{4}{5}\right) + \frac{4}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$5. \left(-\frac{1}{2}\right) + \left(-\frac{2}{5}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$6. \left(-\frac{2}{6}\right) + \frac{4}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$7. \left(-\frac{1}{3}\right) + \frac{1}{4} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$8. \left(-\frac{1}{2}\right) + \frac{1}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$9. \left(-\frac{1}{2}\right) + \frac{3}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$10. \left(-\frac{2}{3}\right) + \left(-\frac{1}{5}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$
