

Ajouter des Negative Fractions (A)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \left(-\frac{1}{11}\right) + \left(-\frac{4}{12}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

Denominator

Solve

Simplify

$$2. \left(-\frac{1}{2}\right) + \frac{8}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$3. \left(-\frac{2}{12}\right) + \frac{10}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$4. \left(-\frac{1}{2}\right) + \frac{1}{7} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$5. \left(-\frac{3}{11}\right) + \frac{8}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$6. \left(-\frac{2}{3}\right) + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$7. \left(-\frac{3}{8}\right) + \left(-\frac{1}{3}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$8. \left(-\frac{1}{8}\right) + \left(-\frac{3}{5}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$9. \left(-\frac{4}{6}\right) + \left(-\frac{1}{7}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$10. \left(-\frac{2}{11}\right) + \frac{5}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$
