

Ajouter des Negative Fractions (D)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \left(-\frac{1}{11}\right) + \left(-\frac{9}{12}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$2. \left(-\frac{1}{3}\right) + \left(-\frac{1}{2}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$3. \left(-\frac{4}{10}\right) + \frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$4. \left(-\frac{2}{8}\right) + \left(-\frac{1}{7}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$5. \left(-\frac{5}{8}\right) + \left(-\frac{2}{7}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$6. \left(-\frac{4}{12}\right) + \frac{5}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$7. \left(-\frac{3}{10}\right) + \frac{1}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$8. \left(-\frac{4}{7}\right) + \frac{7}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$9. \left(-\frac{4}{9}\right) + \frac{8}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$10. \left(-\frac{2}{7}\right) + \frac{5}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$
