

## Ajouter des Negative Fractions (G)

Nom: \_\_\_\_\_

Date: \_\_\_\_\_

Note: \_\_\_\_\_

Calculez chaque somme.

$$1. \left(-\frac{4}{10}\right) + \left(-\frac{5}{9}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$2. \left(-\frac{6}{10}\right) + \frac{6}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$3. \left(-\frac{3}{8}\right) + \frac{1}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$4. \left(-\frac{6}{7}\right) + \frac{4}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$5. \left(-\frac{3}{4}\right) + \left(-\frac{2}{11}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$6. \left(-\frac{2}{8}\right) + \frac{5}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$7. \left(-\frac{1}{3}\right) + \frac{2}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$8. \left(-\frac{2}{4}\right) + \frac{3}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$9. \left(-\frac{1}{2}\right) + \frac{2}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$10. \left(-\frac{6}{11}\right) + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$
