

Ajouter des Negative Fractions (J)

Nom: _____

Date: _____

Note: _____

Calculez chaque somme.

$$1. \left(-\frac{4}{7}\right) + \frac{6}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$2. \left(-\frac{4}{10}\right) + \frac{5}{7} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$$

$$3. \left(-\frac{5}{8}\right) + \frac{5}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$4. \left(-\frac{1}{10}\right) + \left(-\frac{7}{9}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$5. \left(-\frac{2}{11}\right) + \left(-\frac{4}{7}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$6. \left(-\frac{3}{8}\right) + \frac{8}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$7. \left(-\frac{3}{5}\right) + \frac{1}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$8. \left(-\frac{5}{6}\right) + \frac{4}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$9. \left(-\frac{4}{7}\right) + \frac{5}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$10. \left(-\frac{1}{11}\right) + \left(-\frac{1}{2}\right) = \underline{\quad} + \underline{\quad} = \underline{\quad}$$
